

Loudspeaker Cable Advisory for the Evolution One Amplifier

Krell Industries, Inc. strongly advises against the use of any loudspeaker cable that incorporates a passive network of any description, in conjunction with the Evolution One Monaural Power Amplifier.

Consistent with our company standard of delivering the best possible performance, Krell amplifiers are designed to deliver wide bandwidth and maximum current. Use of cables that include passive networks can produce unpredictable results and less than optimal sound.

Warranty

Krell Industries, Inc. may deny warranty claims involving the use of cables that include passive networks with Krell amplifiers.
